Dometic Introduces Tour Awning Range – The best. Made better.

Düsseldorf, Germany – September 3, 2024

Dometic launches a new premium awning range at Caravan Salon 2024. Overhauled from top to bottom, the new Dometic Tour Awning Range combines a minimalistic design with innovative material and clever features.

Dometic, a global leader in outdoor tech solutions, has unveiled the new Dometic Tour Awning Range. The new range, comprised of 33 models suiting caravans, motorhomes and panel vans of all types, sets a new standard in touring awnings. Dometic's latest awnings, denoted by the new

Weathershield Tour material, replaces the iconic Weathershield Pro material, which for 9 years has been the go-to awning material for RV owners the world over.

Key to the new Dometic Tour Awning Range is Weathershield Tour material, a dope-dyed 300D ripstop polyester. The dope-dyed manufacturing process increases the UV colour resistance and ensures that your awning remains vibrant and bright use after use. The dope-dyed material is manufactured more sustainably than the traditional polyesters, using 80% less water which in turn reduces energy consumption. The material also includes a Ripstop weave, which ensures tougher durability to withstand anything your adventure or the weather happens to throw at you.

The new Dometic Tour Awning Range also comes with innovative design changes. The upgraded panoramic windows guarantee lots of natural light – letting you soak up mother nature's panoramic views. For those seeking a little more privacy - the new fabric curtains give a softer touch and have better daylight shielding, whilst the slide track is

improved to make it easier to open and close. The new curtain hooks also makes them simple to remove and wash when ready for your next trip.

The overall aesthetic has changed to a modern and bright color with matching AIR poles, valves and connectors. For the Dometic Residence AIR Tour and Dometic Club AIR Tour DA Awnings, a 3-side canopy is added to provide rain shelter above all entrances, for comfortable access to the awning no matter the outside conditions.

Both inflatable and poled Dometic Tour Awnings now come with new QuickPitch straps, helping you set up shelter in lightning speed by reducing the number of pegging points required to secure the awning. The straps match the overall color scheme and use reflective stitching to improve visibility at night. It's perfect for RV road trippers and tourers seeking a weekend getaway in nature.

'Dometic is committed to redefining outdoor experiences,' says Eva Karlsson, President of Segment Land Vehicle EMEA at Dometic. 'With the new Dometic Tour Awning Range, we've focused on enhancing durability and comfort, ensuring that whether you're seeking protection from the elements or enjoying panoramic views, our awnings are designed to meet the demands of every adventure.'
